

# Total Building Solutions

The Hills Technology Solutions Group represents the technology and expertise of the business units within the Electronic Security and Entertainment division of Hills Industries Ltd, as well as complimenting the wider Hills Group of Companies.

The role of this group is to provide the best product and technology solutions for builders, developers, architects, security consultants, specifiers and electrical contractors. From large multi-residential complexes, through to commercial premises, public venues, and multi-site retail chains, Hills has the knowledge and expertise to provide an exceptional project solution, as a single supplier meeting multiple technology needs.

## Smart Design

Our first concern is understanding our customer's requirements. Through a consultation process, our representatives work with the client to determine the key elements required in any system or site design:

- > the technology that is needed to achieve the desired outcome
- > the best product combinations and solutions available
- > the level of integration required between systems
- > the development of customised software solutions
- > the timeframes for delivery of the project
- > the budgetary restrictions

This ensures that the emphasis is on tailoring a solution to fit the client.

Smart design means flexibility for the users.

## Inspired Technology

Our constantly evolving technological environment requires Hills to keep one step ahead with the finest engineering resources and technical capabilities available, in order to produce customised product solutions for every project undertaken. Harnessing the power of world-renowned brands such as GE, Pelco, Sony, and Samsung, Hills are committed to bringing you inspired technology solutions, with options for future-proofing your investment by making your systems forward compatible.

## Leading Products

The Hills Technology Solutions Group offers a comprehensive range of leading products for security, telecommunications, video, IP, audio, satellite and transmission systems. Products include alarm systems, access control, home integrated systems, wiring and cabling infrastructure, CCTV, MATV and Combined UHF/VHF antenna, just to name a few.

We pride ourselves on delivering exceptional training courses for all users on any of our products, facilitated through the Hills group of companies.

Our focus is not only on providing the solution, but also to deliver after-sales service, ensuring that our leading products meet strict quality standards and are fit for purpose. Our service centres handle clients' requirements for warranties and repairs with minimal interruption to the workflow.

## Innovative Solutions

By the integration of building services and systems that are customised to fit your particular project requirements, Hills are able to provide innovative solutions for your smart office, smart building, smart home, smart retail store, smart commercial premises.... And the list goes on.

When it comes to building solutions.....

be inspired by technology from Hills.
